

# How to add a video to a UG prospectus subject page

You need the YouTube video code.

Either get this from the video URL:

or alternatively, use the "share" link on the video's page and remove the beginning bit.

That is:

```
http://youtu.be/TtFBsprIXPM  
  
=>  
  
TtFBsprIXPM
```

1. log in to [the prospectus admin screen](#)
2. paste the code into the box marked YouTube video code
3. toggle the video on via the Display the video profile checkbox
4. save

And you are done.

Note that you need to add the code **and** toggle the video for it to appear on the subject page.
