

Anchors

Anchors are links at the top of the page that link to a section in the within the same page.

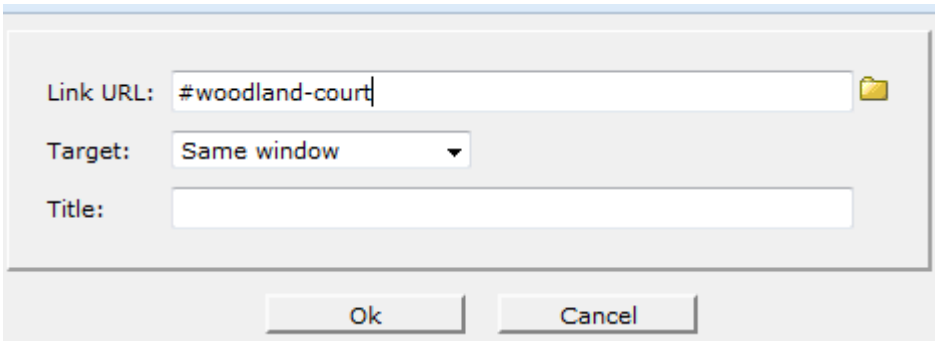

Creating the anchor

1. Place your cursor at the beginning of the line where you want the anchor to be located
2. Click on the  icon in the editor toolbar
3. Type in the Anchor Name in the box that appears. This follows the [rules of web address naming](#). Then click OK.

The image shows a dialog box titled "Anchor Properties" with a close button in the top right corner. Inside the dialog, there is a label "Anchor Name" above a text input field containing the text "woodland-court". At the bottom of the dialog, there are two buttons: "OK" and "Cancel".

4. An anchor icon will appear on the position of the page:
 Proin et erat eros.
5. You can then [add the links](#) to the top of that page to go to the anchors. However, you just need to put the name of the link in the Link URL box with the # in front of it:

The image shows a dialog box for creating a link. It has three input fields: "Link URL:" with the text "#woodland-court" and a folder icon to its right; "Target:" with a dropdown menu showing "Same window"; and "Title:" with an empty text input field. At the bottom, there are "Ok" and "Cancel" buttons.
