

# Where are my files

(click to enlarge)

Previously your files were stored on the web server, which you accessed via the W:\ drive.

Now, with the CMS, your files are stored in an Oracle database on a server, which you access via the CMS workspace.

So, instead of mapping the W:\ drive and copying or saving files to it, you now [create files in the OpenCms workspace or upload them to it.](#)

Unable to render {include} The included page could not be found.
