

Properties and advanced properties

The Web Services Team will set up the properties of your site as per the example below. Folders within the main folder of your site will inherit the properties of the parent folder.

The only properties you will need to set are Description and Keywords (see example below).

bath.leftcol-nav changes depending on which section of the site you are in. So, in the fictitious example below, the Department of Oenology has six main menu sections (Home, Growing, Harvesting, Fermentation, and Vineyards). Each of these sections of the site has a different left-hand menu associated with it, so the bath.leftcol-nav property will contain the address of the left-hand menu include file for that section.

Section	bath.leftcol-nav property
Home	/oenology/site-components/navigation/home-menu.inc
Growing	/oenology/site-components/navigation/growing-menu.inc
Harvesting	/oenology/site-components/navigation/harvesting-menu.inc
Fermentation	/oenology/site-components/navigation/fermentation-menu.inc
Vineyards	/oenology/site-components/navigation/vineyards-menu.inc
Tasting and sales	/oenology/site-components/navigation/tasting-sales-menu.inc
