

Activities & Resources

Moodle can support the learning and teaching experience through the provision of a wide range of tools. These facilitate resource delivery and access to a range of online activities and (where used appropriately), can help the Moodle Teacher to construct an exciting and dynamic learning environment for their students.

As a general rule, it is not necessary to know what each resource or activity setting does, however most settings in Moodle will be accompanied by a help icon . Clicking on the help icon will open up context sensitive assistance which may be useful for those wishing to explore additional settings.

Resources

Anyone with Teacher permissions to a Moodle course will be able to upload content to it. Content commonly ranges from documents and web links, through to audio or visual materials.

- [Uploading Files](#) - instructions on how to upload (and deleted uploaded) files
- [Working with Folders](#) - learn how to create and organise folders
- [Linking to external websites](#) - create and display links to internal and external websites
- [Embedding content from non-secure sites](#)

Activities

Prior to exploring the **Activities and Resources** below, you may wish to consider how to use the [Activity Chooser](#).

Assignment - Used to submit files for marking. Integrated with the Turnitin plagiarism detection service.

Book - Makes it easy to create multi-page resources with a book-like format. 

Chat - A synchronous chat tool useful for small group work. 

Choice - Similar to a poll. Often used to enable students to select seminar groups etc. 

Database - Enables data to be input (by either Teachers or Students) and stored in a searchable format. 

Forum - An asynchronous discussion tool. 

Glossary - List of definitions – can be populated by either Teacher or Students. 

Lesson - Produces structured yet flexible learning paths. 

Quiz - Online quiz tool that can automatically provide marks and feedback to the student. 

SCORM package - Enables SCORM packages to be uploaded to a Moodle course. 

Wiki - A series of web pages that can be edited by anyone. Useful for group projects. 

Workshop - Facilitates peer and self assessment. 

Please note that where the  logo is displayed, you will be taken to the [Moodle Docs](#) website for further information.

Further comprehensive support material for all **Moodle Resources** can be found on the [Moodle Docs website](#).
