

Mobile Learning

Members of the e-learning Team have been running a number of coffee breaks (15 minute online presentations) on different applications of mobile learning within an HE context.

14th October (run by Andy Ramsden)

"This session will focus on the use of Evernote (<http://www.evernote.com>) as your virtual notebook on your smartphone or iPod. Enabling the student to collect data and thoughts, organise, re-visit and share these with others. Learning contexts range from placement students to reflective notes"
